

CURRICULUM VITAE

PERSONAL INFORMATION

First name/Surname	István György TÓTH
Address	TÁRKI Social Research Institute Budaörsi u. 45, Budapest 1112
Telephone	+361 309 7676
E-mail	toth@tarki.hu
Nationality	Hungarian
Date of birth	10 September 1962
Gender	Male

SUMMARY OF CURRENT PROFESSIONAL ACTIVITIES

Area	Description
Management:	Directorship of Tárki Social research Institute since 1994, administration of various research infrastructures (managing TARKI Social Science Data Archive in CESSDA and various large scale empirical projects like HHP, TARKI Household Monitor and others)
Research	Applied social science research in economics and in sociology experience since 1986 (for major projects:, listed in “major research projects” section)
Teaching:	Sociology and social policy teaching between 1986 and 1999 (economics of social policy) and since (occasional lectures on sociology and social structure) at Corvinus University, Budapest and its predecessors
Social reporting:	Editing and publishing in the Hungarian Social Report series (biannually, from 1998 to date) and of the Tárki European Social Report, since 2008
Editing:	Editorial boards in various Hungarian and international journals (Századvég 1995-2003, Statisztikai Szemle 1999-2004, Esély 2004-2008, Közgazdasági Szemle 2009- Czech Sociological Review 2009) and book series (Report on Hungarian Public Education 1995-2006)

PERSONAL HISTORY

Job history	
Dates	January 1994 – present
Occupation or position held	Director (deputy in 1994, general director since Jan, 1995)
Name of employer	TÁRKI Social Research Institute (Tarki Social Research Informatics Centre until 1998)
Dates	2006-present
Occupation or position held	Privatdozent
Name of employer	Budapest University of Economics, Dept. of Sociology
Dates	1986- 2006
Occupation or position held	Assistant professor, then Associate Professor
Name of employer	Budapest University of Economics, Dept. of Sociology

Dates	February 1992 – June 1993		
Occupation or position held	Member of the Board of Trustees		
Name of employer	National Pension Insurance Fund		
Dates	March 1991 – January 1992		
Occupation or position held	Deputy Chief of Section		
Name of employer	Ministry of Finance, Institute for Economic Policy and Planning		
Education and training			
Dates	2003		
Title of qualification awarded	PhD in Sociology		
Organisation providing education	Budapest University of Economics and Public Administration		
Dates	1986		
Title of qualification awarded	Graduate degree in economics and sociology		
Organisation providing education	Karl Marx University of Economics, Budapest		
Fellowships, scholarships			
Nature of scholarship	Research scholar		
Place	London School of Economics and political Sciences , Department of Social Science and Administration,		
Duration	1987-88, 6 months		
Nature of scholarship	Guest researcher		
Place	Institut für die Wissenschaften vom Menschen (Vienna)		
Duration	1996 July		
Awards			
Title of Award	Order of Merit of the Hungarian Republic, Officer's Cross		
Date received	2010		
Title of Award	Golden Grade, Merit Cross of the Hungarian Republic		
Date received	2003		
Title of Award	Erdei Ferenc Award		
Name and address of awarding institute	Hungarian Sociological Association		
Date received	1997		
Title of Award	Pro Universitate MKKE		
Date received	1985

		Description	Position	Client/sponsor
2006-2008	<i>Lifepath analysis of Hungarian households.</i>	A follow-up study of the Hungarian Household Panel via re-contacting the original 1992 sample members.	Principal Researcher	National Office for Research and Technology (NKTH) Contract No: B2-2006-005
1996, 1999, 2007	<i>“The state and its citizens” study</i>	A series of empirical research on tax awareness, fiscal illusions and attitudes towards the reform of the welfare state in Hungary	Principal researcher (in 1996 and 1999 with János Kornai, in 1996 with László Csontos)	1996 and 1999: Ministry of Finance 2007: Prime Minister’s Office
1998-2000 (annual), 2001-present (bi-annual)	<i>Tárki Household Monitor series</i>	A series of cross section studies on income distribution, labour market situation and social stratification in Hungary.	Project manager	Prime Minister’s Office from 2001, various clients between 1998-2000
1992-1997	<i>Hungarian Household Panel.</i>	A longitudinal study of 2600 household sample of Hungarian households. The aim is to analyze longitudinally the changes in income distribution, labor market situation and social stratification in Hungary.	Project director.	Major funder: Hungarian National Science Foundation (OTKA). Various other contractual funders
Leadership in other major commissioned studies				
2008-2009	<i>Study on Child Poverty in Europe, Research Program Commissioned by the DG Employment of the European Union, 2008–2009</i>	A study on in-depth analysis of the determinants of child poverty, policy overview and impact analysis, identification of best indicators	Co-director (with Terry Ward, Applica)	DG Employment of the EC, Unit E2.

2005- present	<i>European Observatory on the Social Situation – Network on Social Inclusion and Income Distribution.</i>	A consortium lead by Applica, Brussels (having TÁRKI, Essex University and Eurocentre, Vienna) produces annual monitoring reports on trends of income distribution and social inclusion in Europe.	Member of the core team	Unit for Social and Demographic Analysis, DG Employment, Social Affairs and Equal Opportunities of the European Commission
2007	<i>The ex ante evaluation of the Hungarian national Development plan</i>	Assessment of the potential impact of national development policies on economic growth, employment, income distribution, poverty and on general government balances.	Project leader.	National Development Agency
2006-2007	<i>SIMGLOBE – Is Social Europe Fit for Globalisation? A study of the social impact of globalisation</i>	Background analysis of the social dimension of globalisation and the impacts of globalisation on income distribution In Europe and other regions of the world	Research contributor	CEPS, Belgium based on contract from DG Employment of the European Commission
2005	<i>The social impact of development policies (2005)</i>	Develop a detailed methodology (cost-benefit methods and public policy evaluation) to assess development policies on different social sectors	Project leader	National Development Agency, (Contract No: NFH 263/2005 (05/08/23))
2004-2005	<i>Social development assessment papers backing the National Development Plan of Hungary (2004-2005)</i>	– A wide scale program aimed to provide state-of-the-art in different social phenomenon from health to social legislation, and formulate policy alternatives - Project leader	Project leader	National Development Agency, (Contract No: NFH 311/2004 (04/11/26))

2004	<i>Modelling social developments until 2020 in Hungary (2004)</i>	Long-term social projection accounting alternative scenarios with their conditions and outcomes.	Project leader	National Development Agency, (Contract No: NFH 57/2004 (04/03/30))
2002-2004	<i>Integration and Development Policy Task Force, set up by the Hungarian National Development Authority, Human Resource Development Subcommittee</i>	Concept papers for the preparation of national Development Plan's human development priorities, develop evaluation and monitoring methodologies	Chair, project leader	Prime Ministers' Office National Development Office, MEH-VI/L-648/2002 (02/12))
1997	<i>Social Policy Strategy Paper for the Hungarian Government (1997)</i>	Evaluation of different social policy areas and policy suggestions in order to better reconciliation of different incentives. Indicator development for monitoring policy impact.	Project leader	Ministry of Social Affaires [1997]

RESEARCH BIO

As a researcher, I conducted a number of *empirical studies on income distribution*, welfare policies and income maintenance. A summary book on income distribution based on these surveys has been published in 2005 (Tóth, 2005). I coordinated the major Hungarian longitudinal survey on income and labour market dynamics, the *Hungarian Household Panel survey* (Tóth, 1995a, Sik and Tóth, 1998). This survey, starting in 1991 had the basic aim of following the changes in labour markets, income inequalities and poverty in Hungary during the transition period. The *Hungarian Household Panel* became the most important single source of income and labour market dynamics in Hungary. The Panel also became member of various international projects (it represented Hungarian data in LIS and was used by various World Bank and OECD reports on Hungarian social and labour market policies). When the project finished, Tarki started a new cross section of Hungarian Households under the name of *TÁRKI Household Monitor*, of which I was also responsible to manage. On the basis of these datasets I investigated trends in income distribution and poverty in Hungary (Szivós and Tóth, 1998, Tóth, 2003, 2008a) and in international context (Förster and Tóth 1997, 1998, 2001, Andorka, Ferge and Tóth, 1997). In addition, the role of welfare programs in alleviating poverty was among the aims of my studies (Tóth, 1995, 1997, Förster, Szivós and Tóth, 1999, Förster and Tóth, 2001). The most recent report of the Monitor analysed the effects of the 2009 austerity package on income distribution (Tóth, 2010) Also, the dataset has been (and currently is) utilized as a powerful source of micromodelling of public tax/transfer policies (description of the first version: Rudas, Szivós and Tóth, 1998). Most recently this *microsimulation database* became a regular source of analyses by the Hungarian Ministry of Finance. In 2007-2008 we carried out an unprecedented attempt to re-contact the 1992 sample of the Household Panel Study. We this we arrived at a unique dataset which facilitates long-term longitudinal analysis of the social effects of the transition (Kolosi and Tóth ed. 2008, Kolosi and Tóth 2008, for a summary in English see Tarki (2008).

I participated in formulating various *strategy papers* for the reform of the Hungarian Welfare State. An early attempt of this type was made for the order of the joint American-Hungarian Blue Ribbon Committee (an international non-partisan body set up prior to the first free elections in the country in 1990). After years of consultative process, scientific publications have been published, summarising and analysing the major reform suggestions (Andorka, Kondratas and Tóth, eds. 1994, Andorka, Kondratas and Tóth, 1995). Shortly after it, as a *consultant* to the OECD, I also participated in the writing of an OECD review on Hungarian social and labour market polices (OECD, 1995). Later on, in the framework of a major TÁRKI project, a strategy paper for the Hungarian Ministry of Welfare was formulated under my leadership (Tóth, ed, 1998). I also was a consultant in 1997 and 1999 to the World Bank, first working on the Hungarian Poverty assessment review, than on the SAPRI project (Tóth, 1998). After the 1995 austerity package in Hungary, a book was published under a joint editorship of Lajos Bokros (the than Minister of Finance) together with the responsible World Bank official on the lessons of the package. I contributed to this with an assessment of the family policy reforms (Sipos and Tóth, 1998).

During the transition period, reform attempts had to cope with difficult side effects of the “transformational recession”, while building up of new institutions was also among the primary aims. The institutional reforms were sometimes be captured by status quo effects and current policy deadlocks. This process, with *special focus on fiscal illusions and public perceptions* of the state activities in health, education, pensions and welfare was in the focus of the research project “*The state and its citizens*” (Kornai, Csontos and Tóth 1996, Csontos, Kornai and Tóth 1998, 1999, Csontos and Tóth, 1998). The second wave of this series dealt with health reforms (Janky and Tóth eds 1999), while the third wave of this research focused on tax awareness, tax avoidance and the demand for redistribution (Medgyesi and Tóth, eds. 2007, and most recently Tóth 2008b) The description and analysis of social trends is a very important aim of the *social indicators movement*. I contributed to it as an editor of the Hungarian Social report (Kolosi, Tóth and Vukovich, 1998, 2000, 2002, 2004, 2006, Kolosi, and Tóth, 2008 in Hungarian and Kolosi, Vukovich and Tóth 1999, 2004 in English) and as editor of reports on the social situation of men and women (Lévai and Tóth, 1997, Pongráczné and Tóth, 1999, Nagy, Pongráczné and Tóth, 2001, 2005).

Most recently Tarki started a new series of European Social Reports (Tóth, ed, 2008, 2009). The plan of the series includes further thematic issues on attitudes as well as on income distribution and social structure of the whole European Union.

As part of the social reporting activities in my professional career I participated in various projects related to *indicator development*. First, the data flow of the TÁRKI household surveys serves as a benchmark in assessing Hungarian societal developments (Tóth, 2004, Szivós and Tóth, 2008). Second, I participated in various steps of the social indicator development of the European Union (lectured on the 2nd Social Inclusion Roundtable in Torino in 2003, served as a Steering Committee member of the “Taking forward social inclusion” project organised by the Luxembourg presidency of the EU in 2007. In addition, since 2005, I am a member of the core team of a consortium which *monitors and reports on trends in income distribution and social inclusion*, i.e. the overall inclusiveness of *European societies*. It monitors the situation regarding income and wealth, the impact of tax/benefit systems, the access to services, questions related to poverty and population groups particularly at risk of exclusion. The reports are commissioned by DG Employment of the EC. (see for the most recent reports at Ward et al, 2009, Lelkes, Medgyesi, Tóth, 2009, Lelkes, Medgyesi, Tóth, Ward 2009, Medgyesi, Tóth 2009) Another study in this series was within the frame of the SIMGLOBE project, carried out by a consortium led by CEPS, Belgium. Within that we tried to answer the question if social Europe is fit for globalisation. The Tarki task of this project was to identify international income distribution trends and summarize the literature on how globalisation can be identified as one potential source of growing international inequalities (see CEPS, 2008).

Tarki, as a leader of a consortium, prepared a study of child poverty in the EU in 2009, of which I serve as a co-director, together with Terry Ward. The aim of the project was to in-depth analyse child poverty in the EU countries and develop and suggest indicators to DG Employment and the Indicator Subgroup of the Social Protection Committee of the EU.

As my *teaching* position in Corvinus University (earlier: Budapest University of Economic Sciences) was always related to social policy, I was responsible for teaching of economics and sociology of the welfare state. I was involved in curriculum development and as a result a reader on these issues was published (Csaba and Tóth, 1999). Also, I taught at regular intervals in Joint Vienna Institute (in the OECD segment on social policy) as a guest speaker on Hungarian social policies (since the mid 90's on an annual basis until recently) and at various courses of the World Bank (2001), Luxemburg Income Study (various years in the nineties) and the University of Florence (2007)
