12.30 1051 Kossuth Lajos tér 1-3 - BUDAPEST

The 2nd Policy Dialogue organized by the [SPES project – Sustainability Performances, Evidence and Scenarios](#) (funded by Horizon Europe), in cooperation with TARKI Social Research Institute and the Hungarian National Council for Sustainable Development, **focuses on the key role played by Environment and Sustainable Development Advisory Councils in several European countries for integrated policy-making.** It aims to trigger an exchange on the translation of cutting-edge evidence on sustainability transition into integrated, whole-of-society policymaking at national level.

Current societal challenges, such as accelerating climate and biodiversity crises, rising cost of living and growing multidimensional inequalities, geopolitical conflicts and political polarisation, require **balancing economic objectives with the goals of achieving sustainable human development and wellbeing for all.**

To do so, it is crucial to better **address various synergies and trade-offs among the multiple dimensions of the sustainability transition:** this involves combining environmental concerns and awareness of planetary limits to growth with both inclusiveness and equality of opportunities, and long-term societal prosperity.

However, despite meaningful efforts by various European, national and local actors, social, environmental and economic policies are still often made in silos rather than with **an interinstitutional and whole-of-society approach.** Implementing such an approach requires bridging the gap between scientific and academic evidence as well as practical experiences on the ground on the one hand and integrated policy-making processes on the other.

This can support developing policy interventions that consistently leverage synergies (and minimise trade-offs/tensions) through mutually reinforcing policy mixes.

9.00-9.30

OPENING REMARKS

9.30-9.50

SETTING THE SCENE PRESENTATION: SYNERGIES AND TRADE-OFFS OF THE SUSTAINABLE TRANSITION

9.50-10.50

ROUNDTABLE I NATIONAL LEVEL PRACTICES SUPPORTING INTEGRATED DECISION-MAKING FOR THE SUSTAINABLE TRANSITION

11.10-12.25

ROUNDTABLE II SYNERGIES AND CHALLENGES FOR THE HUNGARIAN SUSTAINABLE TRANSITION PROCESS

12.25-12.30
